

<div>Level:</div> <div>Grade 5</div>	<div> <div>Lines</div> <div>(Geometry)</div> </div>	<div>Course</div> <div>Math</div>
<div>Line: A straight figure with no thickness that extends forever in both directions.</div>		
<div>  </div>		
<div>Lines are named by two points they pass through.</div>		
<div>  </div>	<div>  </div>	<div>  </div>
<div>Lines can interacts with eachother in three specific ways.</div>		
<div>Parallel: The lines will never touch. They look the same but are in different locations.</div>	<div>Intersecting lines: The lines touch or go through each other. They intersect.</div>	<div>Perpendicular: Lines intersect creating right angles. You can draw a box between the lines</div>
<div>  </div>	<div>  </div>	<div>  </div>
<div>  </div>	<div>  </div>	<div>  </div>
